

Drive Success with Multi-Tenant SaaS: Key Benefits for Trucking Fleets

Cost Savings & Efficiency

✓ Save up to 50% on maintenance and support costs.

✓ All customers run the same up-to-date software, reducing storage, maintenance, and support costs.

✓ Modern, user-friendly UI puts all info on a single screen for fast, easy use.

Configurability Without Customization

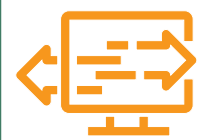

✓ Quickly toggle features to match specific job functions without custom coding.

✓ Dynamic map shows capacity and load imbalances up to 5 days in advance.

✓ Integrated weather and traffic data for smarter route planning.

Seamless Integration

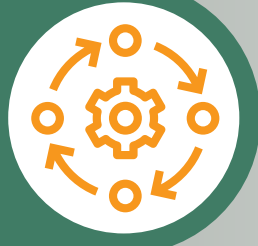

✓ Connect easily with third-party tools like ELDs and telematics.

✓ Universal access to integrations at no extra cost.

✓ EDI protocols streamline data sharing between carriers and shippers.

Always Up-to-Date

✓ Automatic updates ensure everyone has the latest tools at no extra cost.

✓ Scalability allows fleets to grow without reconfiguration or new setup fees.

Enterprise-Level Security

✓ Benefit from enterprise-grade protection without the extra costs.

✓ Data is securely stored with cloud providers AWS and Azure, ensuring safe access and top-tier data protection.
